IVORY® Rubber Dam

Made from natural latex, thoroughly washed in the manufacturing stage to reduce surface proteins. Ivory dam has extremely high tear strength, reducing waste from tearing during application. The dam is thin and pliable, allowing easy placement in especially difficult areas. The bright blue or green tint increases visibility by its contrast.

Available in 6x6 or 5x5 (medium weight).

IVORY® Punch

This precision instrument is made from high quality stainless steel. The unique floating plunger strikes all edges of the cutting disc evenly, guaranteeing a perfect, tear-resistant hole every time. The cutting disc rotates through a range of 6 hole sizes, providing the correct opening for the smallest anterior tooth to the largest molar.

IVORY® Forceps

The Ivory forceps are made from high grade stainless steel, which will assure many years of use. The forceps will reach around the bow of any clamp without tilting, which is especially important when reversing a clamp. The straight head design allows easy gripping and placement of any clamp size.

IVORY® Rubber Dam Kits

The Ivory Clamp Starter Kit offers a selection of the most widely used clamps. These popular clamps provide a variety of general use clamps that fulfill most needs. The Rubber Dam Complete Kit is a self-contained unit providing all the necessary equipment for the Rubber Dam Technique. The Complete Kit is especially useful for the practitioner just beginning their practice or for one who is implementing the technique for the first time.
