Initial adaptation of crown

- Two principles related to SSC length and margin shape that are based on an understanding of the tooth morphology and gingival tissue contours were presented by Spedding 1984
- The crown should be of a correct length and its margins should be adapted closely to the tooth.
- For shaping the crown margins mark 3 light points on the metal at the (mesiolingual, lingual and distolingual) and at (mesiobuccal, buccal, distobuccal) surfaces at the crest of respective marginal gingiva without compressing the marginal gingiva.
- Final finished margins are placed approximately 1mm below these marks.

3M™ Prefabricated Crowns Reference Chart

Type	Coverage	Dentition	Selection	Key Traits
3M™ Polycarbonate Crowns				
	Short or long term	Permanent	Anterior or bicuspid	<ul style="list-style-type: none"> • Polycarbonate resin with micro-glass fibers • Strong/durable • Contours and crimps similar to metal crowns • Esthetic/U62 shade
3M™ Strip Crown Forms				
	N/A	Primary	Anterior	<ul style="list-style-type: none"> • Automatically contours restorative material to match natural dentition • Strips off easily leaving a smooth surface • Thin interproximal walls • Sufficient strength for easy handling • Ideal for chemical or light-cured composites
3M™ Iso-Form™ Crowns				
	Short term	Permanent	Molar and bicuspid	<ul style="list-style-type: none"> • Tin-silver alloy • Pre-finished, belled and contoured • Ductile/can be stretched and burnished to fit prep margins • Faster placement than acrylics or chemical resins for single units
3M™ Gold Anodized Crown Replacements				
	Short term	Permanent	Molar and bicuspid	<ul style="list-style-type: none"> • Medium-hard aluminum for durability and function • Gold anodized to eliminate metallic taste and galvanic shock • Parallel wall design
3M™ Stainless Steel Crowns				
	Short or long term	Permanent	Molar	<ul style="list-style-type: none"> • Minimal adjustment • Pre-trimmed, belled and crimped • Accurately duplicates anatomy • Superior longevity compared to multi-surface amalgam fillings
		Primary	Molar	
3M™ Unitek™ Stainless Steel Crowns				
	Short or long term	Permanent	Molar and bicuspid	<ul style="list-style-type: none"> • Shallow occlusal anatomy/less tooth reduction • Thick occlusal surface to prevent bite-through • Parallel walls • Pre-trimmed to optimum length and contour
		Primary	Anterior and molar
